complete a mock
project for a
Mentoring Platform

Work scope

Attend

Training sessions and work hours. Our attendance was tracked.

Do assignments

Complete training and mid-assignment in phase 1.

Mock project

No real project, just a mock project to test us on Phase 2.

Lives up to its name: Work-Integrated Learning.

03

Deliverables & Lessons

Key deliverables

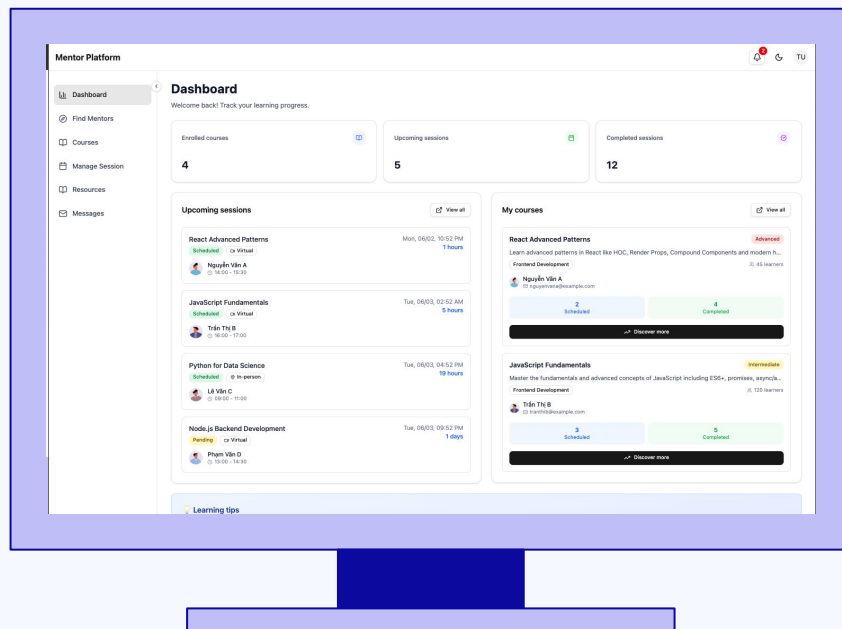

Product: Mentor Platform mock project

- Frontend developer (mainly) + some backend.
- Source code and final presentation.

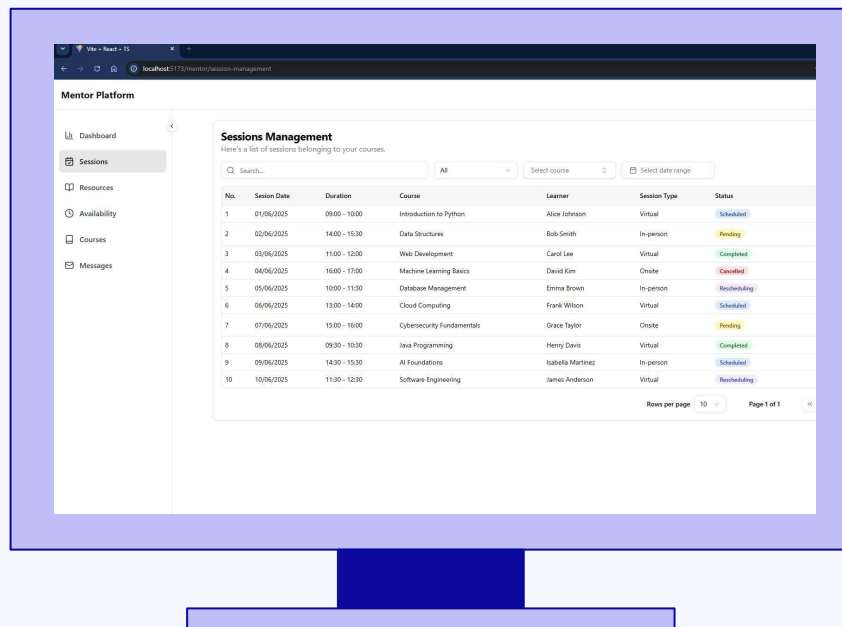

Process: Scrum

- We were required to use Scrum framework.
- I was the tech lead.
- We were assessed in terms of how well we understood and followed the process.

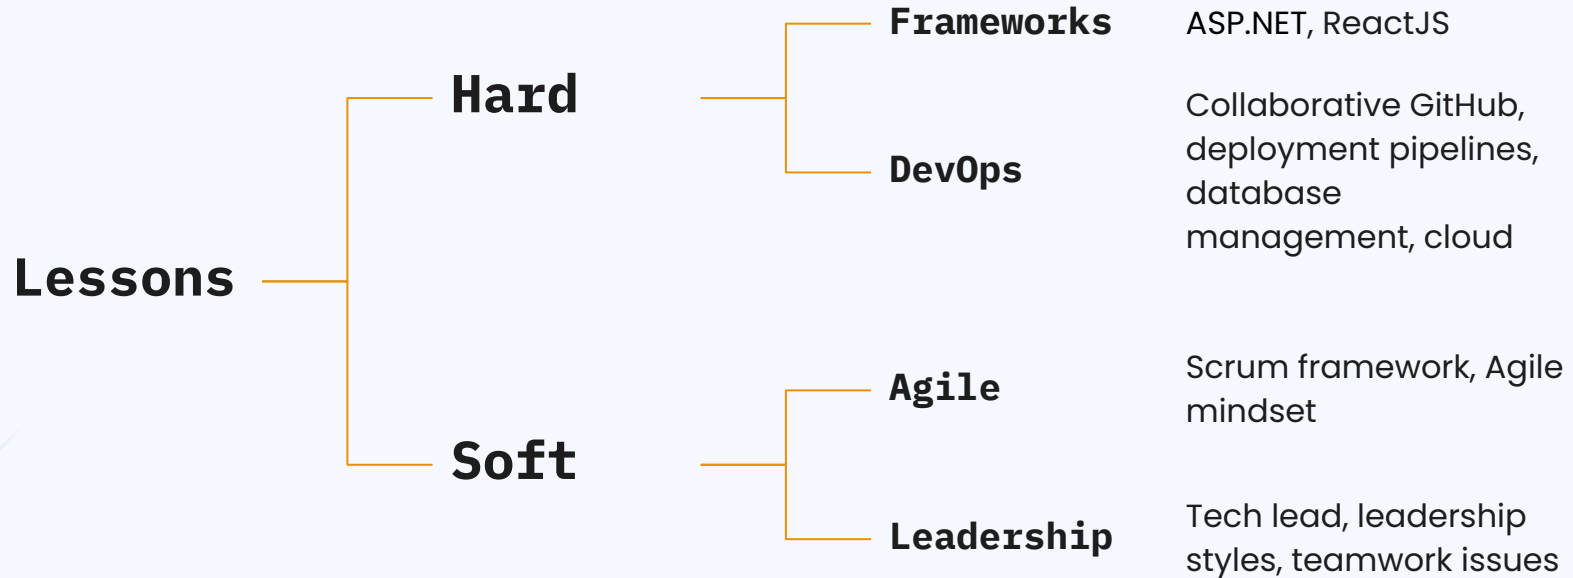

Sample UI

Lessons learned

04

Development Plan

Next steps

Learn

Backend technologies like Spring. Also build strong frontend skills.

AWS Cert

I want to be familiar with a cloud platform & AWS is the right choice for me.

NAB Vietnam

After an enriching experience at an outsourcing company, I'd like to try out a product company.

Thanks !

Question time :)
